

# SENSEMBERT: CONTEXT-ENHANCED SENSE EMBEDDINGS FOR MULTILINGUAL WORD SENSE DISAMBIGUATION

BIANCA SCARLINI, TOMMASO PASINI AND ROBERTO NAVIGLI

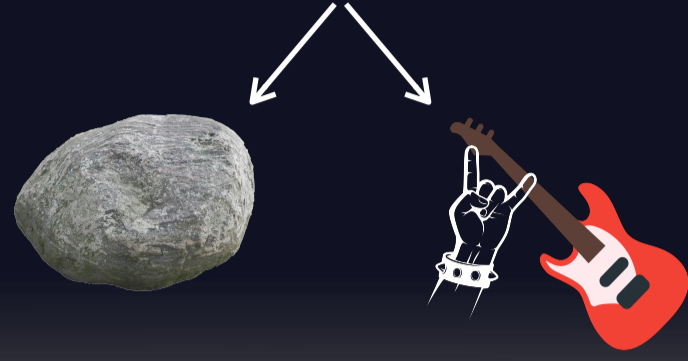

<http://sensebert.org>

## WORD SENSE DISAMBIGUATION

This guitar is good for playing **rock**.

## CONTRIBUTIONS

**Knowledge-based** approach for building sense embeddings in **multiple languages**.

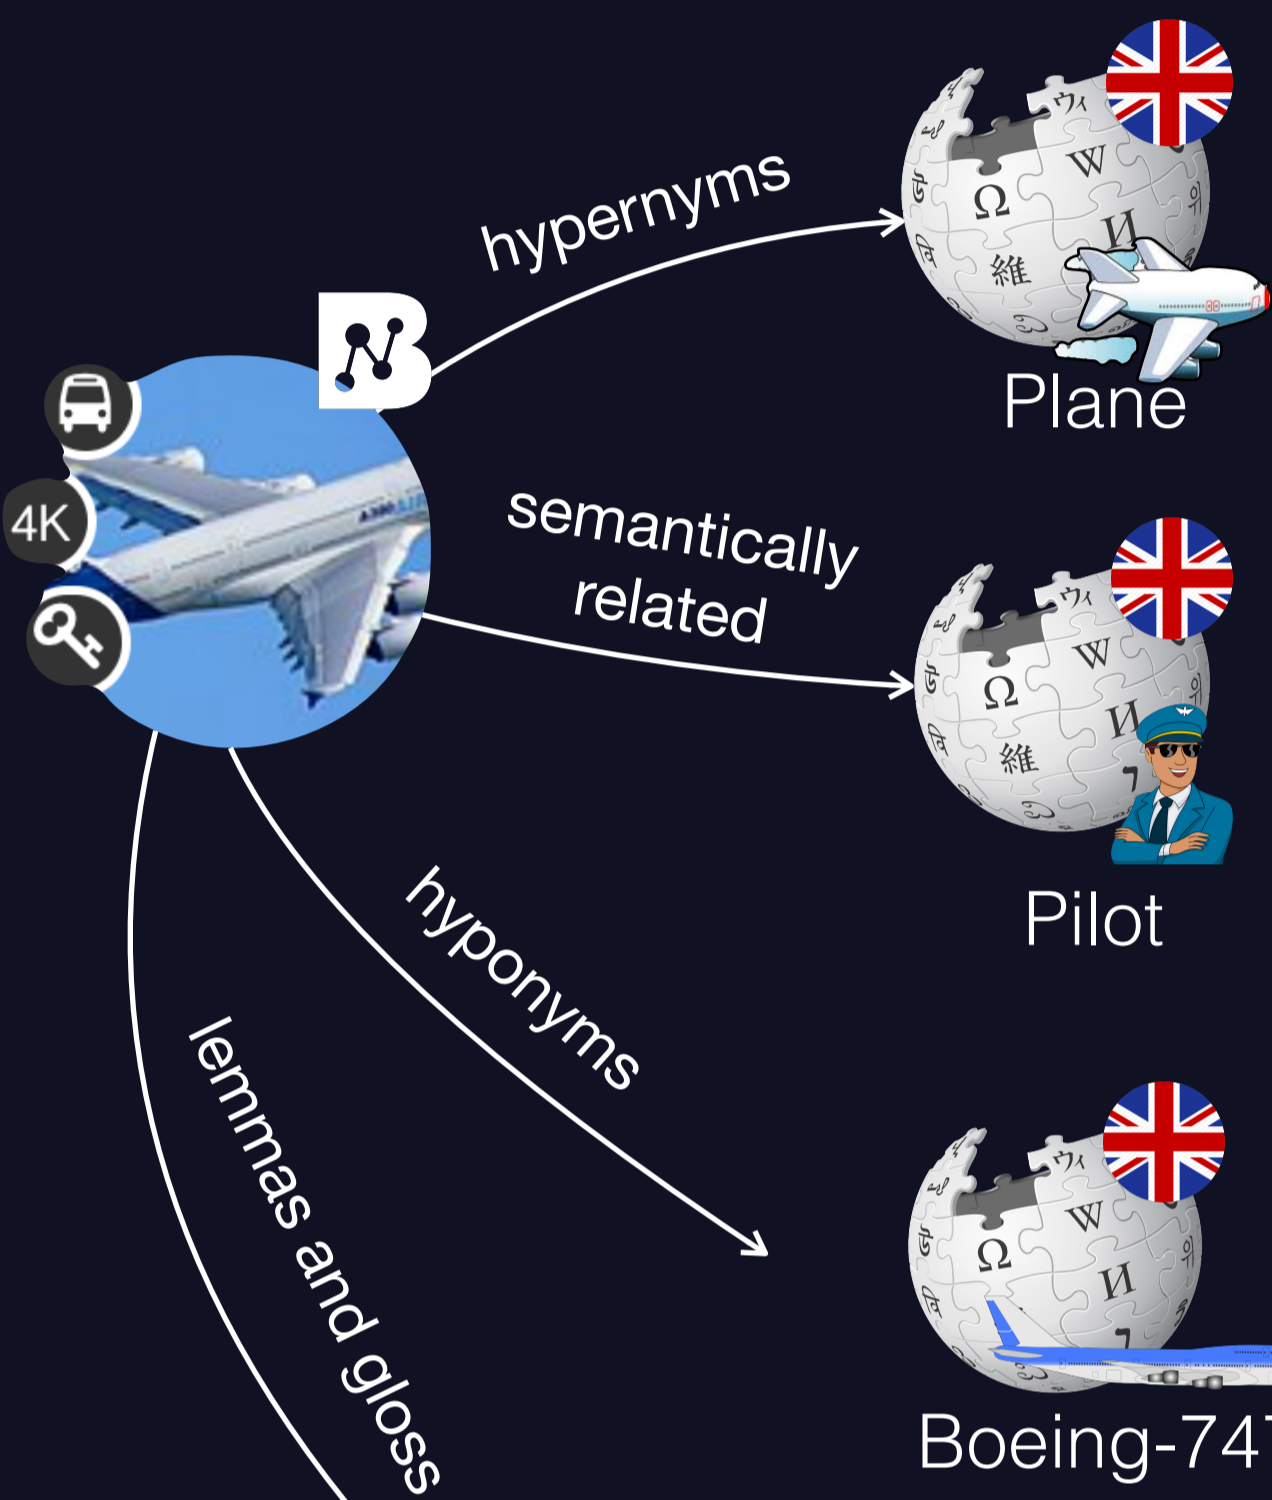

The embeddings take into account the **contexts** where a sense may appear.

The embeddings lay in a latent space that is **comparable** with the one of **BERT** contextual word embeddings.

## METHOD

Relevant words

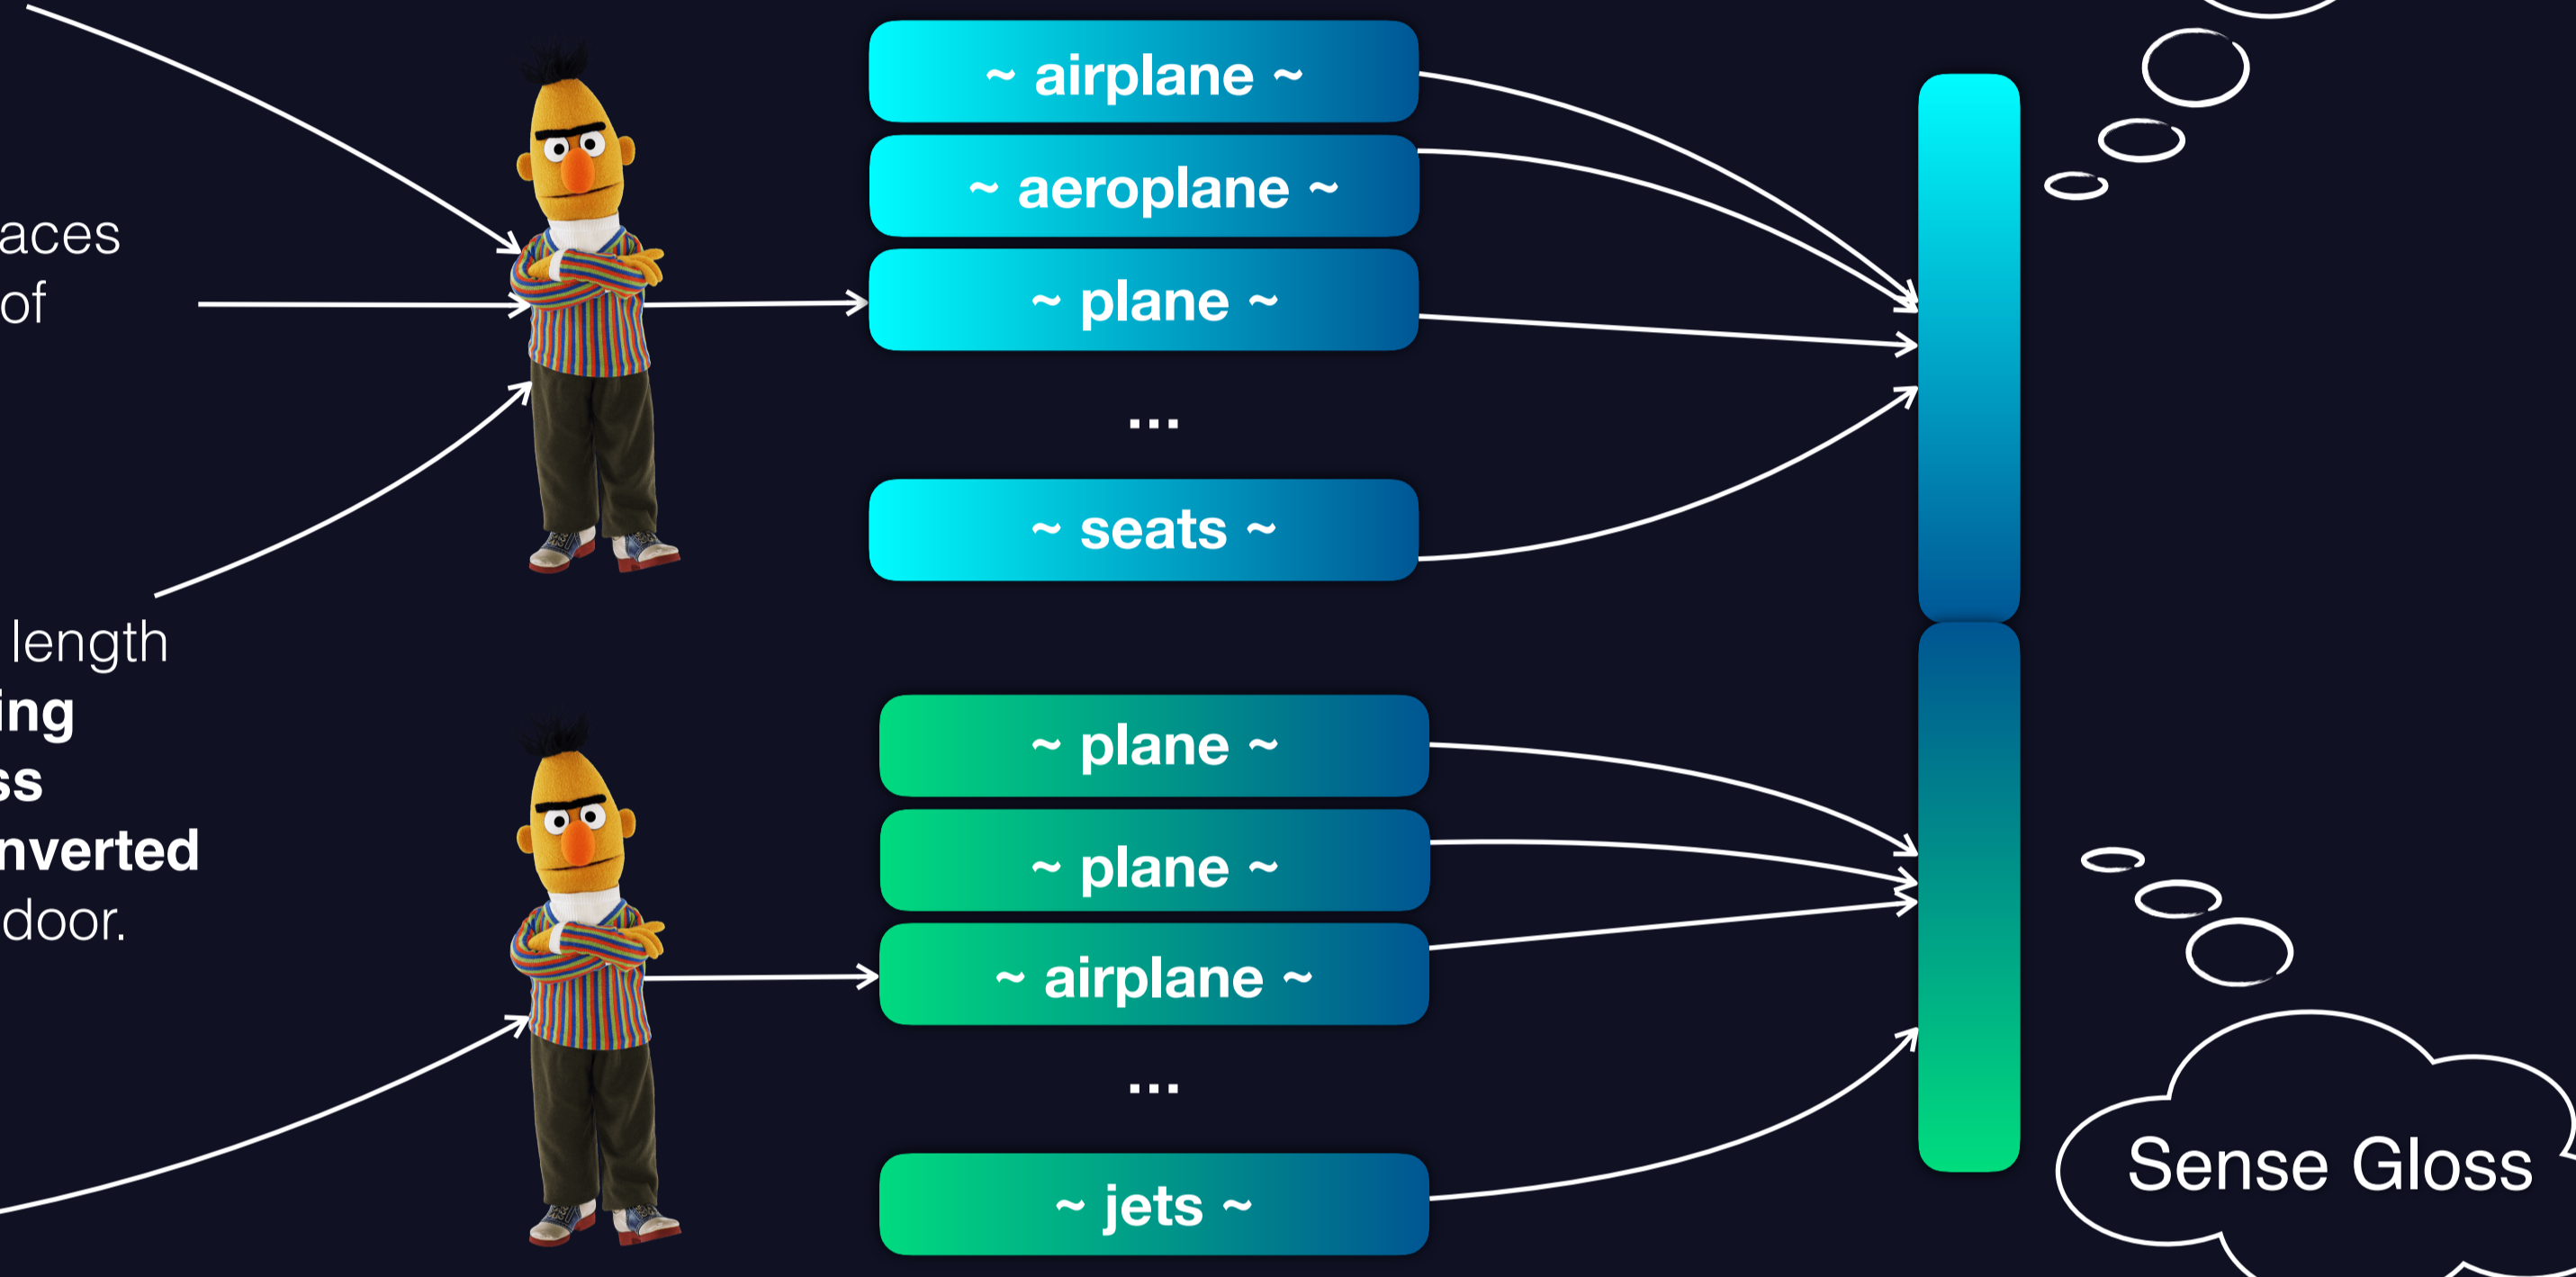

An **airplane** or **aeroplane** (informally **plane**) is a powered, **fixed-wing aircraft** that is **propelled** forward by thrust from a **jet engine**, propeller or **rocket engine**.

The number of **airline pilots** could decrease as **automation** replaces **copilots** and eventually **pilots** as well. [...] the number and kind of **flying jobs** available may be decreased.

The **quadjet 747** uses a **double-deck** configuration for part of its length and is available in **passenger**, freighter, and other versions. **Boeing** designed the **747's** hump-like upper **deck** to serve as a **first-class lounge** or extra **seating**, and to allow the **aircraft** to be easily **converted** to a **cargo** carrier by removing **seats** and installing a front cargo door.

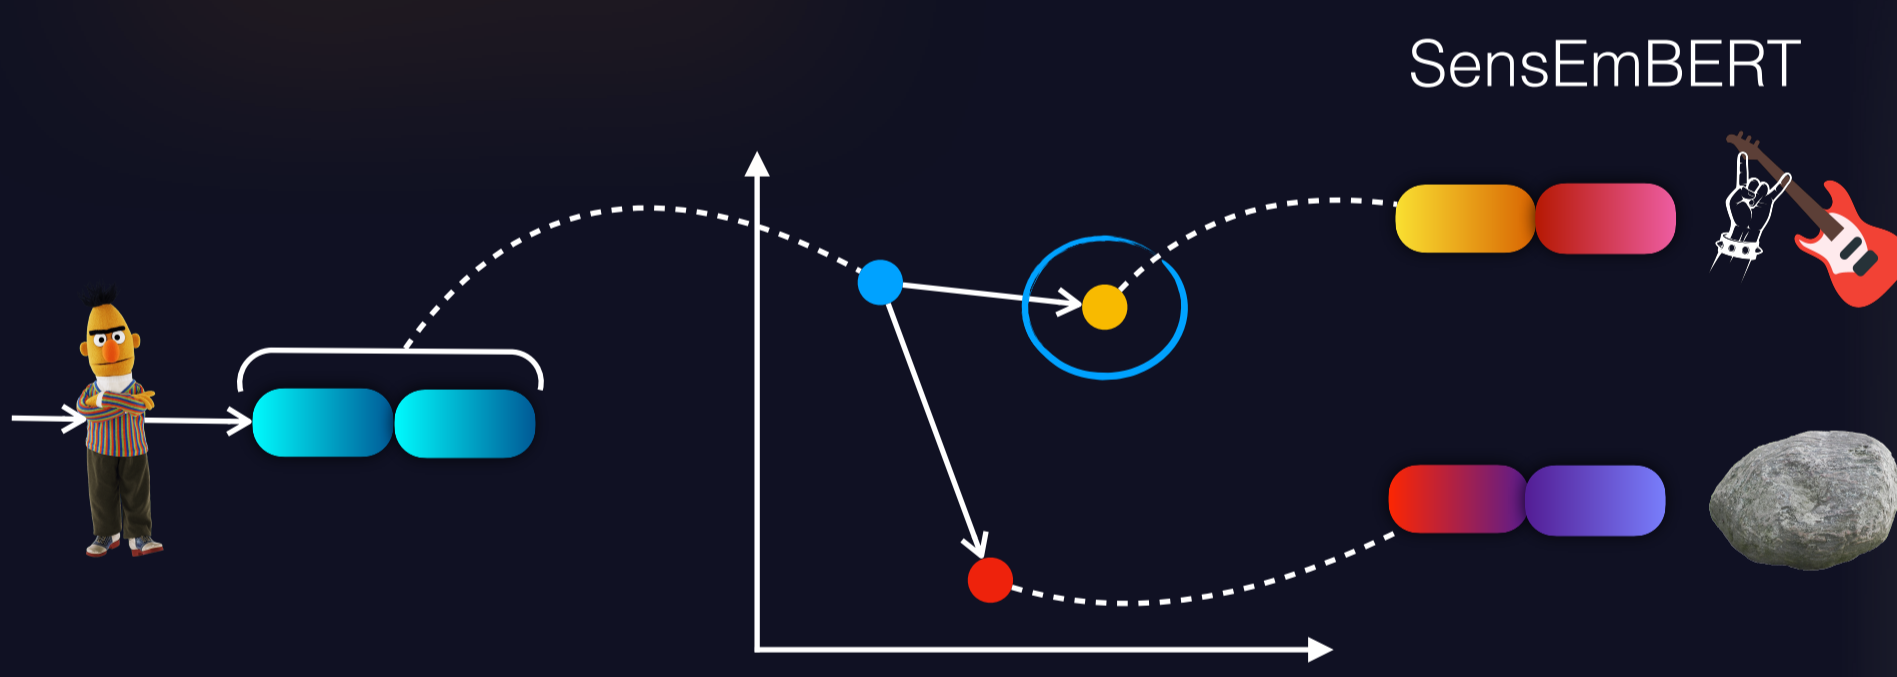

plane - plane, airplane. An aircraft that has a fixed wing and is powered by propellers or jets.

Context

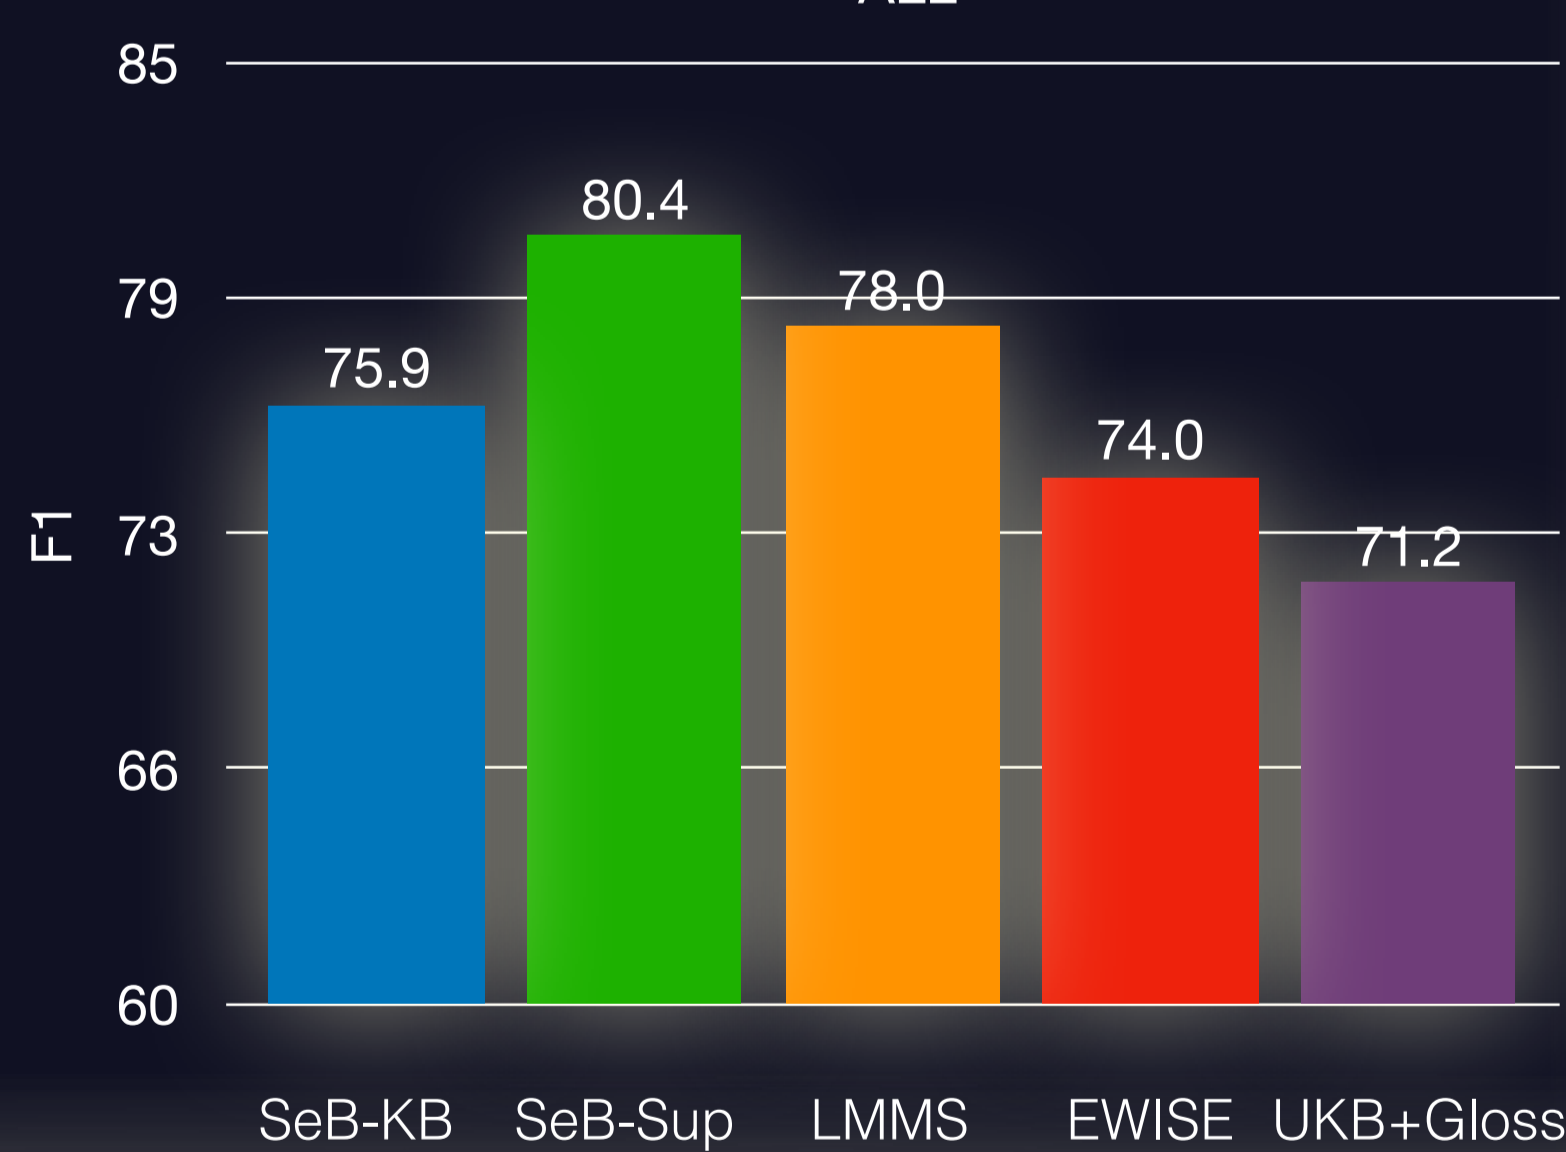

## ENGLISH WSD

This guitar is good for playing **rock**.

### Competing Systems:

- SeB-KB**: SensEmBERT embeddings.
- SeB-Sup**: Combines SemCor contexts with SeB-KB embeddings.
- LMMS**: Sense embeddings learned from SemCor.
- EWISSE**: Neural supervised approach.
- UKB+Gloss**: A knowledge-based algorithm exploiting glosses and semantic relations.

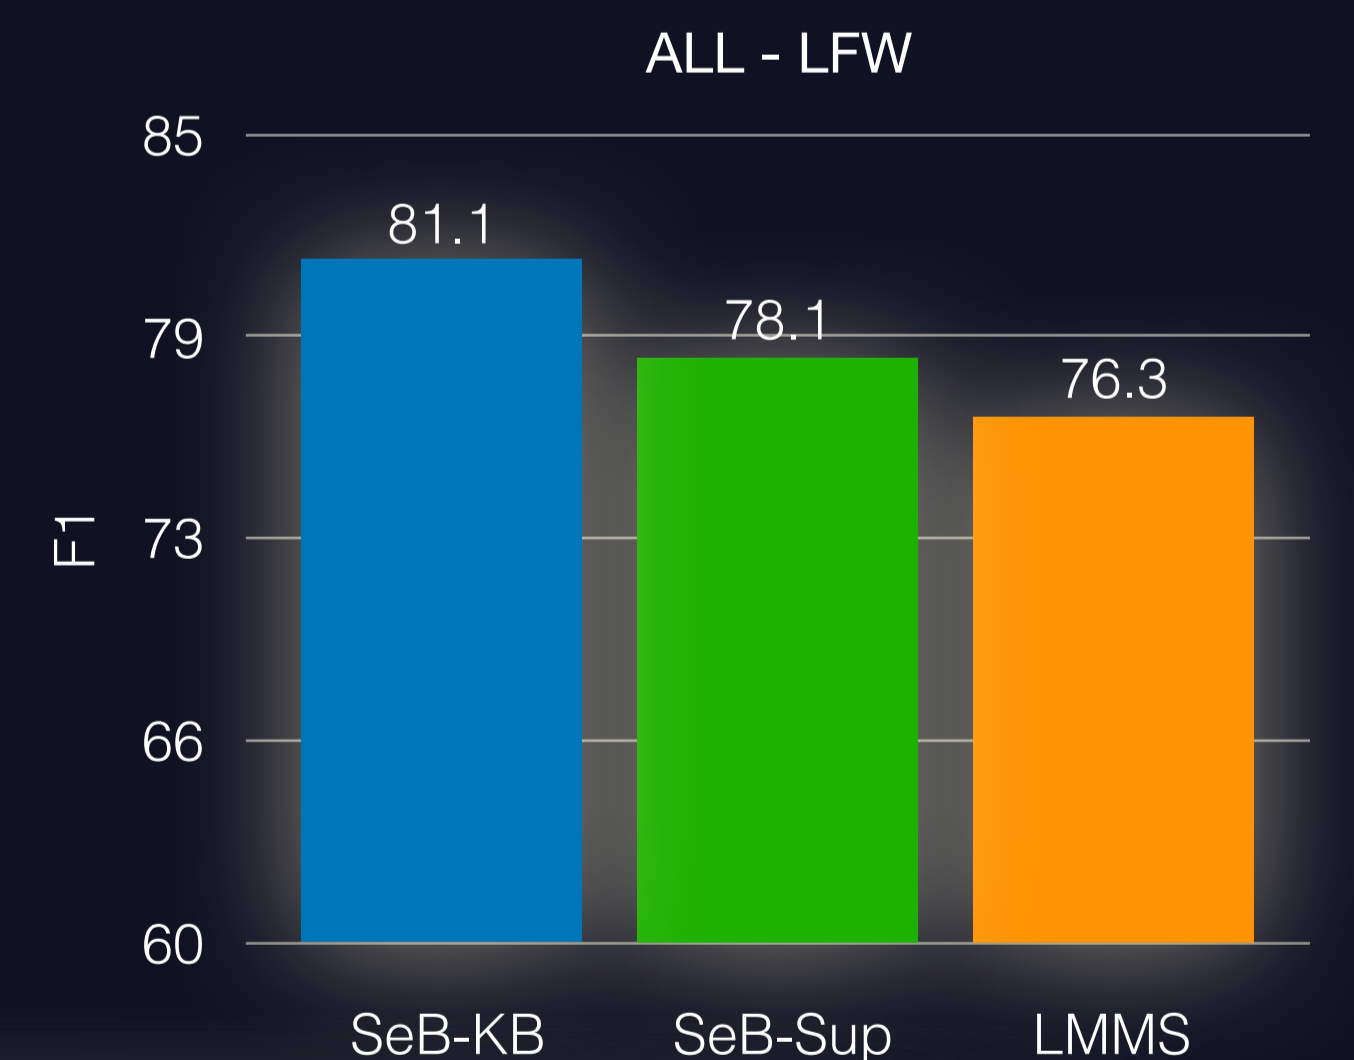

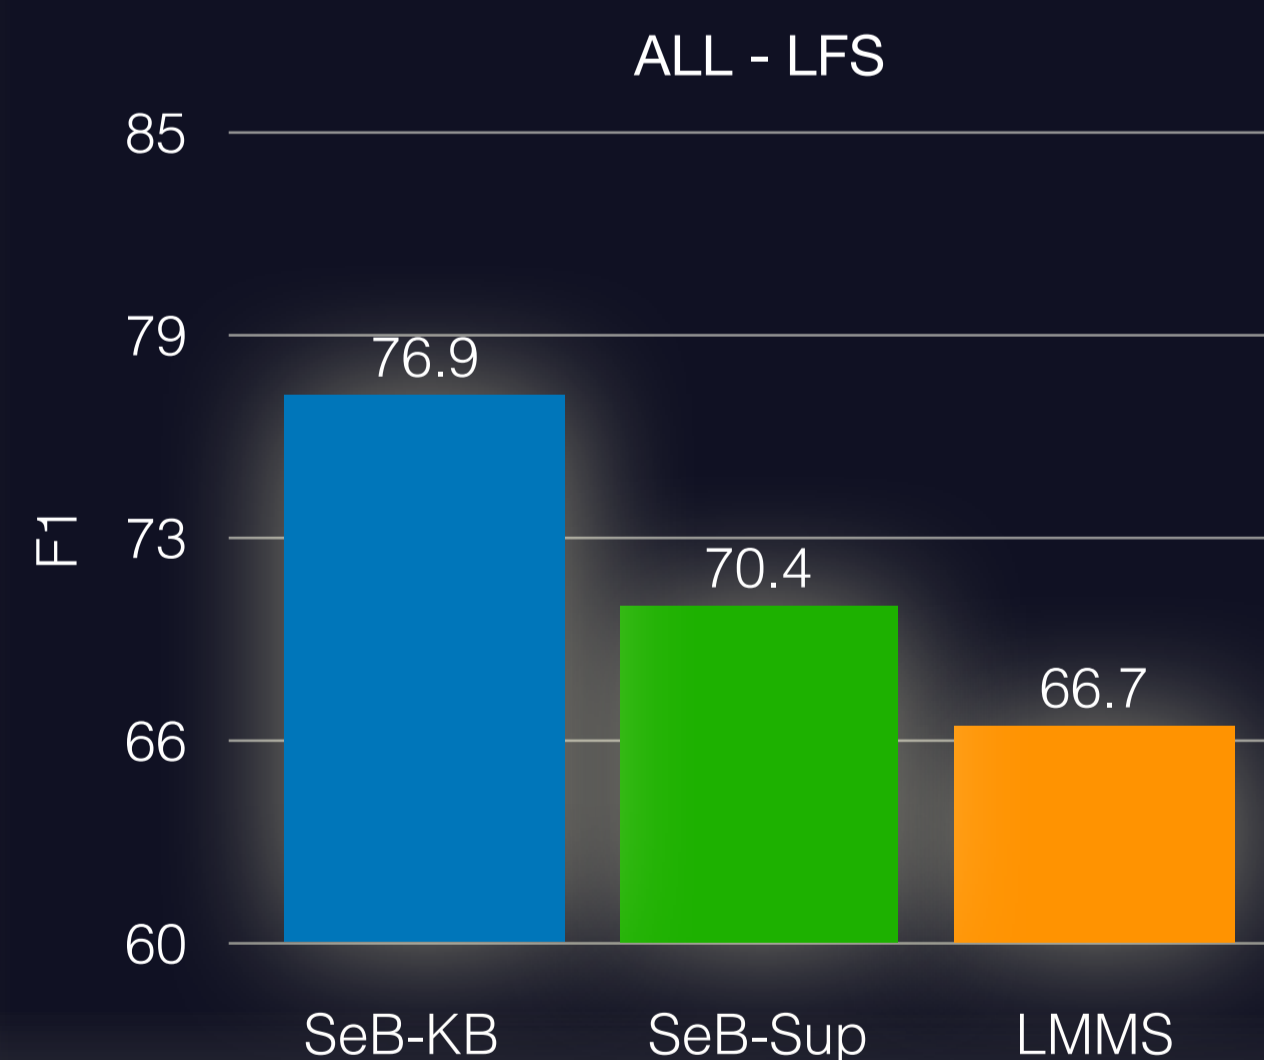

## RARE INSTANCES

### ALL - LFS (Least Frequent Senses):

Dataset containing all the instances in ALL tagged with a sense not in SemCor.

### ALL - LFW (Least Frequent Words):

Dataset containing all the instances in ALL associated with a lemma not in SemCor.

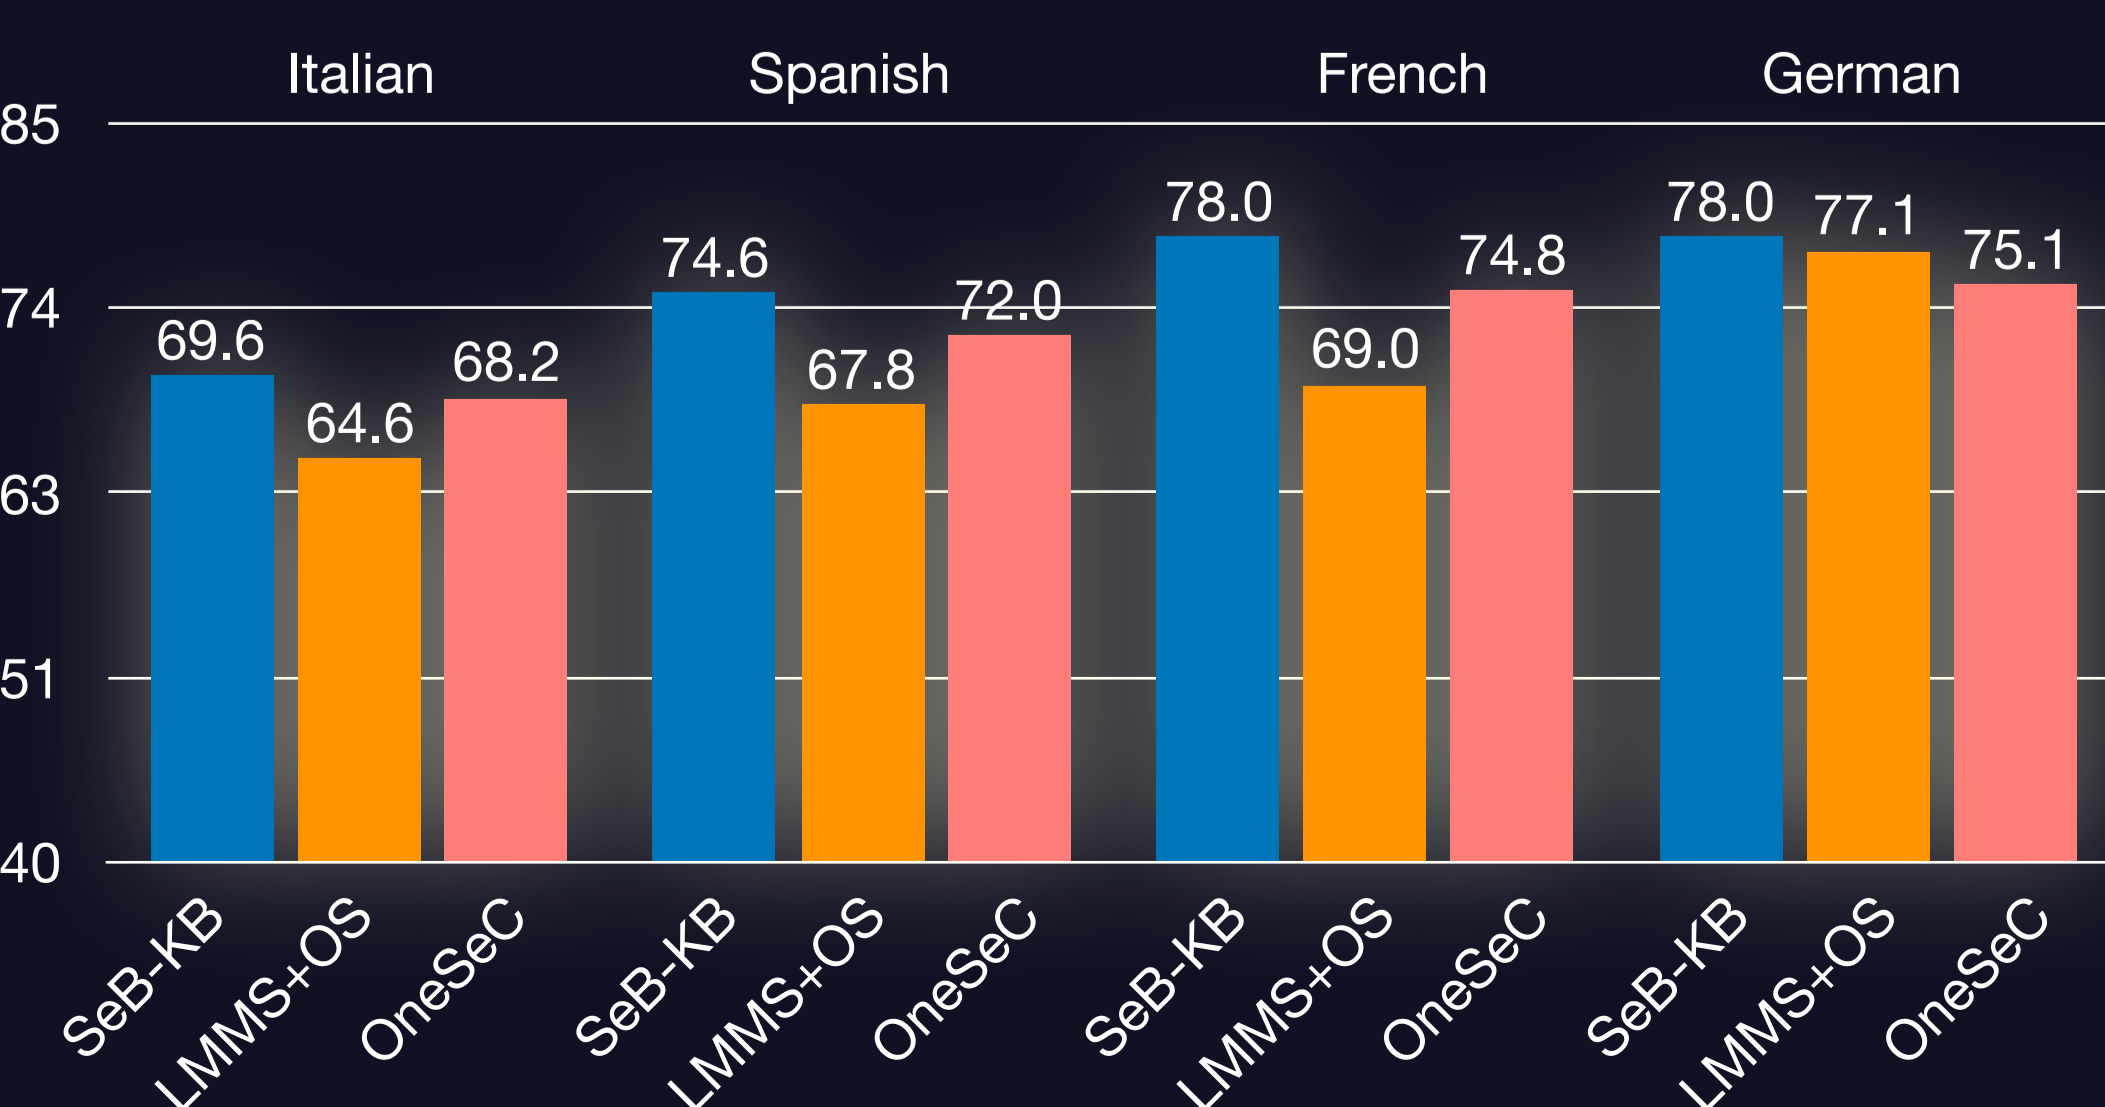

## MULTILINGUAL WSD

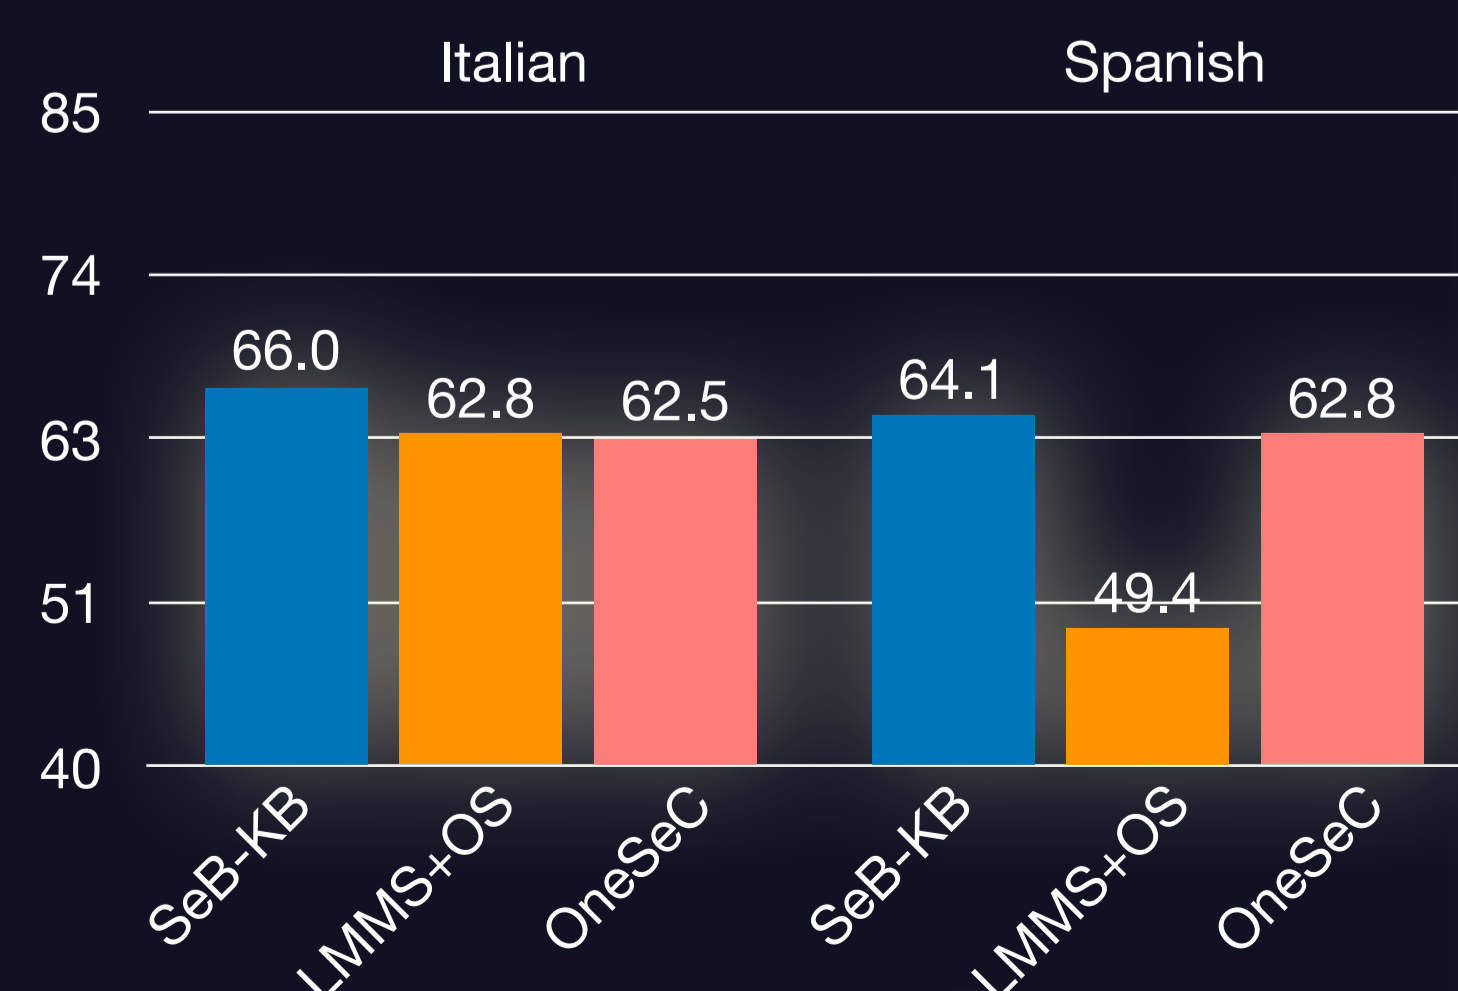

### Competing Systems:

- SeB-KB**: SensEmBERT embeddings.
- OneSeC**: Neural supervised approach trained on OneSeC silver data.
- LMMS+OS**: Sense embeddings learned from OneSeC (OS).

### SemEval-2013

### SemEval-2015

SOTA everywhere!

## CONCLUSIONS & FUTURE WORKS

**Knowledge-based** approach for producing embeddings of senses in **multiple languages**.

**SOTA results** on the English and multilingual WSD tasks.

**NOUNS**  
**ADJECTIVES**  
**VERBS**  
**ADVERBS**

Extend our approach to cover senses with **other POS tags**.
